Litchfield Low Down Spreaders

That is what they are, low down, only waist high, with a Five Year Guarantee Back of Every One.

Simplicity—The Litchfield Low Down has no complicated machinery. There are only two gear wheels on the entire spreader. All parts are unusually strong and there are few of them. Count the gears on other spreaders and the complicated parts and make your own comparison.

In general, we oil with compressed grease cups, our wheels and all other parts that will permit of this system, which combined with the self-oiling journal bearings, come as near fool-proofing the oiling system as it is possible to do. The simple straight, direct methods, followed in the construction of the Litchfield Spreader, make it go out like a farm wagon, never giving you any more trouble. We are free from repair troubles and exporting of the usual kind. We have used the latest ideas in dust-proofing and fool-proofing our machine. This is one more reason for our five year guarantee.

We bought heavy before the advance in prices, therefore we are making you a very good price. Call and see them and be convinced.
